DETAILED ACTION

Applicant's preliminary amendments filed July 28, 2003 have been entered.

Claims 14-19 are pending.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 14-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent 4,626,531 ('531).

'531 teaches a composition of mifepristone tablet (See col. 5, Example 5).

'531 does not teach a kit with instruction material incorporated with it.

It would have been obvious to one of ordinary skill in the art at the time of invention to incorporate an instruction materials with the mifepristone tablet of '531 to form a kit.

Art Unit: 1617

One of ordinary skill in the art would have been motivated to incorporate an instruction materials with the mifepristone tablet of '531 to form a kit. Examiner notes that inclusion of a package insert, which is considered as indicator in the instant case, showing the "the name of drug, dosage, dosage form, route of administration, indication and direction of use" of a pharmaceutical composition is mandated by 21 CFR 201.57 and is therefore obvious to one of ordinary skill in the art. Furthermore, applicant's attention is directed to *In re Ngai*, 70 USPQ2d 1862 (CA FC 2004). The ruling in *Ngai* clearly indicates that simply attaching instruction(s) to the otherwise well-known composition is not patentable.
